

## BATTLES MAD DOG IN STATION CELL

Prisoner in Chicago Lock-Up Has  
Exciting Experience.

## ANIMAL FOUND RABID

Suspected Canine Locked Up in Ad-  
jacent Cell Crawls Through Drain  
Pipe Connecting the Two Rooms  
and Buries Fangs in Man's Leg.

Chicago.—John Anderson, an al-  
leged burglar, was taken to the Pas-  
teur Institute the other day suffering  
from wounds on one leg which may  
prove fatal and which he incurred in  
a desperate fight with a dog in his  
cell at the 50th street police station.  
The animal, also a prisoner, has since  
been found to be suffering from  
rabies.

The dog had been taken to the sta-  
tion after it had attacked and bitten  
at least two and possibly more chil-  
dren living on the south side. Two of  
these victims also were treated at the  
institute.

It was suspected at the time of the  
first attack that the dog might be  
mad. The policeman who captured the  
animal had no safe place in which to  
keep it and finally concluded to  
take it to the station and lock it  
up. It was placed in a cell adjoining  
the one occupied by Anderson, who  
was held as a suspect in burglary  
cases.

During the night the dog prowled  
uneasily around in its cell, growling  
and snarling and making so much  
noise that Anderson, stretched out on  
his plain board bench, could not  
sleep. After some hours, however, he  
managed to fall into a doze.

Suddenly the man was awakened  
by a peculiar scraping sound, and,  
looking up, saw the eyes of the dog  
gleaming at him in his own cell. The

The Animal Flew at Him.

animal had crawled through the drain  
pipe connecting the two cells.

Anderson kicked at the dog with  
his bare foot. The animal flew at him  
and buried its fangs in the man's leg.  
The two fought all over the cell, the  
man screaming for help and the dog  
snarling and growling and getting a  
new hold on the leg every time he  
was shaken from his old hold. Final-  
ly the jailer was aroused and, open-  
ing the cell door, succeeded in beat-  
ing the animal into submission.

Anderson was taken to a doctor at  
once and his wounds were cauterized.  
Dr. Antonio Lagorio was notified of  
what had happened and preparations  
were made to have the alleged burg-  
lar admitted to the Pasteur Institute.

The dog was taken to the pound  
and an examination disclosed beyond  
doubt that it was suffering from hy-  
drophobia.

The fact that the dog was able to  
get from one cell to another is due  
to defects in the plan of construction  
of the cells at the 50th street jail.

## JOKE GIVES VOICE BACK

Girl Finds Self Speechless After  
Storm, but Talks Again When  
"Surprised."

Dollar Bay, Mich.—Every time it  
thunders Lucy Sephalla, twelve years  
old, loses her voice.

Six weeks ago she lost her voice dur-  
ing a thunderstorm. Four weeks later  
it was restored when she was play-  
fully frightened by a friend.

During each electrical storm since  
that time, the young girl has

Phones: Office 698; Residence 524.

# SCHOOLS & COLLEGES

**Lowrey-Phillips.**  
The first month closed last Fri-  
day with the largest opening enroll-  
ment in the history of the school.

The cadets are happy in their uni-  
forms, and the verdict of the girls is  
"they look swell."

During the month many visitors  
were present, and they expressed  
themselves as highly pleased with  
the work and discipline of the  
school.

Mrs. Coleman, the wife of the com-  
mandant will arrive very shortly  
from her vacation season in Colo-  
rado.

Mrs. Barnes, the gifted wife of  
Coach Barnes left Thursday for Ft.  
Worth to take part in several social  
functions. She will be absent sev-  
eral weeks.

Better learn one thing that is  
right rather than three things that  
are wrong is the thought of the Low-  
rey-Phillips school.

The literary societies have been or-  
ganized and many interesting lec-  
tures are on every program.

The Glee Club is making rapid  
progress, and an early concert is  
scheduled. The musical talent of the  
boys is very much in evidence.

The cadets go in camp at the Fair-  
grounds next Thursday and every-  
body is invited to visit headquarters.  
Hear the boys sing their "Alma Ma-  
ter Song," and witness the sham bat-  
tle.

The community is fortunate in  
having Miss McKinzie to teach ex-  
pression this year. Her readings at  
the chapel hour were much appre-  
ciated.

The cadets are thinking the fac-  
ulty should go in uniform, and that  
Prof. Phillips should wear general's  
uniform.

Prof. Lowrey is making an active  
campaign for students, and is personal  
work and addresses are bringing sub-  
stantial results.

Miss Florence McKinzie, a special  
friend of Mr. and Mrs. Jones, arriv-  
ed in this city last Wednesday to be-  
gin work in teaching expression.  
Miss McKinzie is an A. B. of Vir-  
ginia College, a teacher of much  
power and a cultured young woman.  
See her about this work.

The guns came in this week and  
every cadet in drill carries a polished  
rifle. Much credit is due the com-  
mandant for the growing perfec-  
tion in all military movements.

**Seth Ward College Notes.**

President Pearce and Professor  
Cronch went to Amarillo last Mon-  
day to take part in the organization  
of all of the colleges and academies  
of the Panhandle into an Athletic  
Association, and an Oratorical As-  
sociation. They seem very much pleas-  
ed at the results of the meeting. All  
of the schools had representatives  
there and the spirit was fine.

Mr. Pearce went to Floydada  
Tuesday evening and secured two  
students from the Presbyterian Aca-  
demy that has recently closed.

The enrollment is steadily increas-  
ing. Four literary students have en-  
rolled this week, besides several in  
the Fine Arts Department.

Miss Marsalis, at the head of the  
Music Department, is getting her  
work well organized for such a short  
time. She has several studying with  
her, and is taking steps toward the  
organization of an orchestra. The  
chapel choir has been greatly im-  
proved, and other instruments will  
be added. The chapel services are  
being made unusually interesting on  
account of the greater variety.

The Fine Arts faculty will give  
their recital, that was to have been  
given near the opening of school, on  
the night of October 20th, which will  
be Monday night.

Those who are selling tickets to  
the Lyceum course are very busy, and  
the present indications are that the  
programs will be largely attended by  
the people of the town. The first  
number, the Chicago Ladies Orches-  
tra, will be at the Methodist church  
next Monday night.

The Literary societies are doing  
fine work at present. They have ap-  
pointed committees to arrange open-  
session programs, and have begun to  
think about their inter-collegiate de-  
baters.

The foot ball team went to Clar-  
endon to play Saturday after noon,  
and will play Lowrey-Phillips School  
on their return Monday. Seth Ward  
team is rather light but has had  
good training. It will be very weak-  
ened on account of the fact that  
some of the best players are out of  
the game, entirely with wounded  
limbs, and others will not be allowed  
to go on account of a failure to  
make passes in the required number  
of subjects.

## REDUCING THE DOUBLE CHIN

Simple Methods, Persevered In, Will  
Speedily Do Away With Ob-  
jectionable Feature.

One of the most objectionable fea-  
tures is the double chin. This can be  
remedied in one month by the follow-  
ing exercise: First soap the under  
part of the chin with pure soap, and  
plenty of it. Then throw the head  
back till the face looks up to the cell-  
ing. Then press firmly the under chin  
with the thumbs while at the same  
time make the lower chin move back  
and forth against the thumbs. It will  
take some practice, but you will soon  
find the way to cause the movement  
of the fat part of the chin. This will  
strengthen all the muscles and at the  
same time it will eliminate the fatty  
cells. The soap aids in this by cutting  
the fat from the skin.

The exercise can be endured and  
even enjoyed if you have a grapho-  
phone and take the exercise by the  
music. I set my graphophone out in  
the rear garden and take my physical  
culture out in the open air. Besides  
the exercises I had in the college class-  
es I have discovered many new ones.  
Wherever there is excess fat just  
keep on till you find a motion that  
will cause a movement of that fat,  
then work—Health.

## Red-Heeled Slippers.

It was only natural that the incom-  
ing of effective little frocks should  
have brought with them the high-heel-  
ed slippers of the Louis XVI period,  
with their immense buckles in front  
and their slashes of red behind. There  
is a new kind of heel, too, which is  
used on these black slippers, and it  
makes the foot look about three  
inches shorter and it is.

One would say that it was impos-  
sible to walk in them if one had not  
witnessed the ability of women to get  
along in yard-wide skirts and Spanish  
heels that put them on stilts. We  
have learned during the last three  
years that there are few limitations  
to what women can do in the name  
of fashion; if ever these Louis heels  
are adopted by the majority of Amer-  
ican shoemakers, women will wear  
them, and not only turkey trot in  
them, which is all very well, but they  
will go shopping in them, which is all  
very wrong.

# Gas for Everything

**GAS RANGES**—You are missing the most convenient things about the house if you are not using a Gas Range. It saves one-half the time and labor; it is clean and always ready—besides, it is the cheapest.

**GAS LIGHTS**—If you want the light nearest the sun light, you should have Gas Lights, besides it is the most hygienic light produced today, so recognized by the best scientists of this and other countries. It helps to purify the air in the room which no other light does. It is the easiest light for the eye. It is the softest, most pleasant light you can get, and it is the cheapest light by test. We have Gas Mantles guaranteed for ninety days. Let us show you how cheap we can pipe your house and install Gas Lamps and Fixtures.

**GAS IRONS**—If you want to iron for two cents per hour, get a Gas Iron, the next cheapest way is on a Gas Range.

**GAS WATER HEATERS**—We have half a dozen different styles of Gas Water Heaters, either one of which will furnish enough hot water for a bath for from three to five cents. Let us demonstrate the above.

## Amarillo Gas Company

## LUMPKIN-THOMAS HOSPITAL

606 TYLER STREET AMARILLO, TEXAS

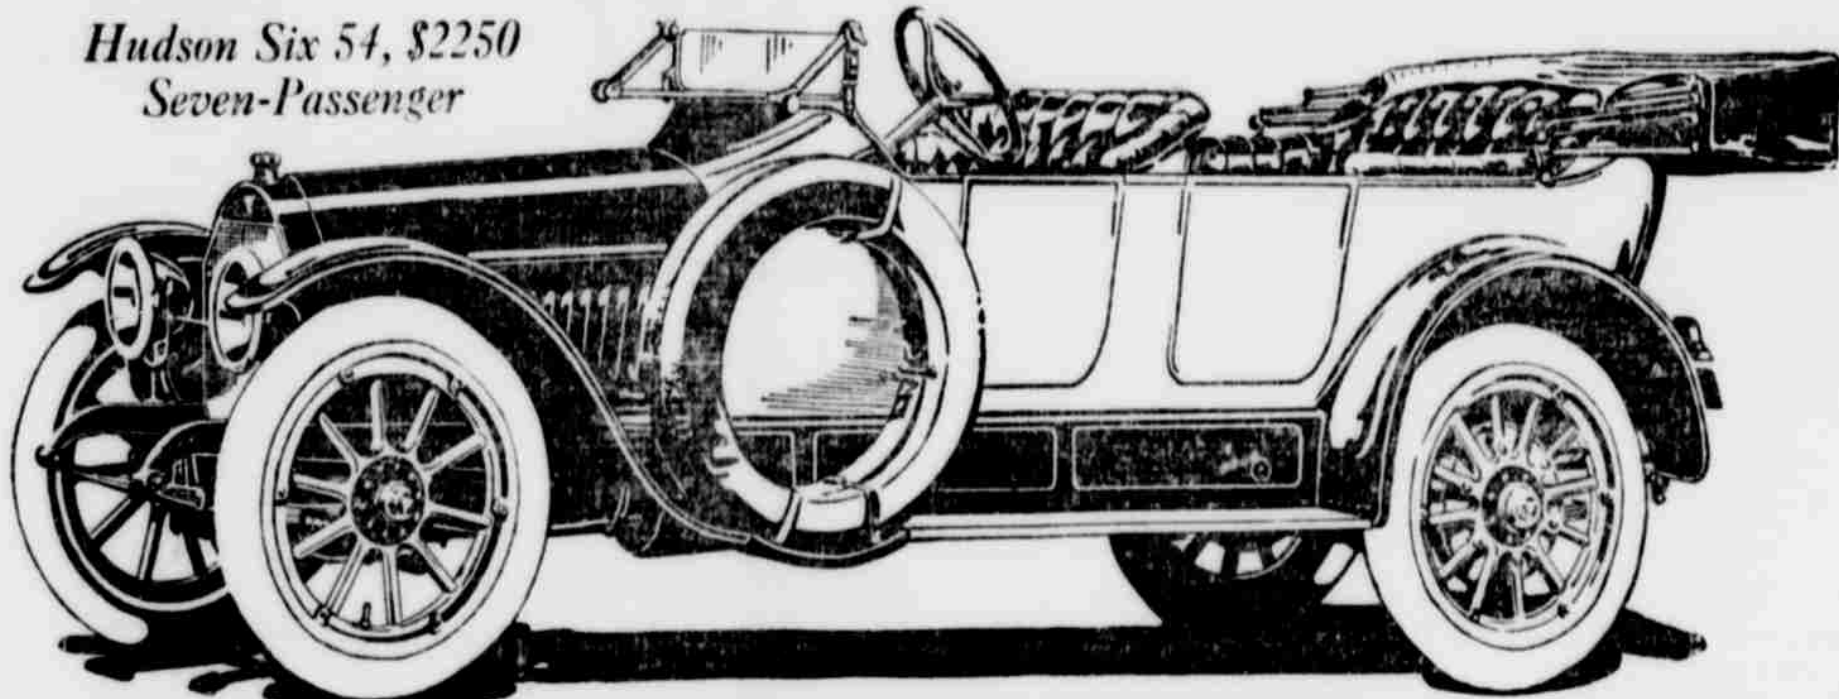

A modern brick building, especially equipped for the care of  
gynecological and surgical cases. Pathological and X-ray  
laboratory. Graduate nurses only.

Telephone No. 18

**Verdi Fetes Nearing a Close.** Verdi, which began September 22, on here. The celebration will cul-  
minate one week hence in a great  
pilgrimage to the tomb of Verdi.

# The New Ideal of a Distinguished Car

**Hudson Six 54, \$2250**  
**Seven-Passenger**

**H**ERE now is a car which typifies the  
ideals of the time. This streamline  
body—this long, sloping hood—this  
absence of angle at the dash—this  
low-hung chassis—these crowned fenders—this  
placing of extra tires so the front doors are left  
clear—these things belong to the car of today.

The consensus of the world's best opinion is  
that this type of car marks the coming ideal car.  
These are radical changes but they are coming as  
surely as foredoors came—and as suddenly.

All the best foreign cars—English, French  
and German—will this year exhibit exclusively  
this new streamline body. And all men know  
that what they adopt in body design becomes  
the world-wide vogue.

Our designers have added a hundred minor  
efficiencies. They have Americanized—have Hud-  
sonized—made it distinctly American.

So the car is distinctive.  
It looks like just like it. But it  
has the highest com-  
fort and the highest con-  
venience.

**FOR SALE**—A new car will  
satisfy you better than any  
old one. Call for more in-  
formation.

**FOR RENT**—Two rooms in  
house, 1125 Buchanan. Phone  
1125.

**FOR RENT**—A new modern place  
in town, 304 Lincoln. Appl.  
see Lincoln. 287-10.

owner expects it. Fine engineering has limits.  
For the past four years Howard E. Coffin and  
his able engineers have given their best to the  
HUDSON. Last year they brought Sixes  
pretty close to perfection. So close that the  
HUDSON Six jumped in one year into the  
foremost rank among Sixes.

These men have worked out in this new-  
model car a vast number of minor engineering  
improvements. They have added scores of new  
mechanical features—some of them quite im-  
portant. But we never expect to build a  
much better chassis than we built in our last  
year's Six.

This year's advances lie mainly in beauty, in  
comfort, in conveniences, in room. We have  
combined the best in lines, finish and equip-  
ment with the best in engineering. We have  
succeeded in making the HUDSON Six the  
masterpiece it is.

## Now the Ideal Car

We now feel that this HUDSON 54 offers the  
utmost in every wanted feature. It has the  
staunchness of steel Pullmans. It has the com-  
fort of Turkish lounging chairs. It has the  
speed of express trains. It is free from all the  
troubles which annoy the inexperienced.

No man knows how to build a car more

handsome and impressive. No conveniences are  
absent, no modern features lacking.

And all these things are here included in a  
Six 54, with seven-passenger body, at the record  
price of \$2250 (f.o.b. Detroit, Michigan).

## The New Features

These are among the new features we bring  
out in this model. No mention is here made of  
the countless features in previous HUDSON  
models which we still retain.

Seven-passenger body.  
135-inch wheelbase.  
Left side drive. Right hand control.  
36 x 45-inch tires.  
Extra tires carried—as never before—ahead of  
the front door. This leaves both front  
doors clear.

Four forward speeds.  
Pure streamline body.  
Low-hung body.  
No angles at the dash.  
Wide tonneau doors.  
Gasoline tank in dash.  
Electric self-cranking, with the rapid type of  
the Delco system built especially for this car.

Powerful electric lights with dimming attach-  
ment for city driving. They also act as  
ordinance lights.

Extra seats in tonneau fold into back of front  
seat, entirely out of the way.

Jeweled magnetic speedometer in dash, with  
new concealed noiseless gears.

Every operation and control placed within  
reach of the driver's hand. Gasoline and oil  
control, lights and starter.

Individual Yale lock and ignition control,  
prevents theft of car.

Rain-vision windshield built as part of the car.  
Genuine Pantalone top. Curtains that are  
carried in the top can be instantly ad-  
justed.

Electric horn—trunk rack—tire holders—  
license carriers—everything.

## Come See It—Come Today

Come to our showrooms and see this new  
achievement. It is not merely an improved car  
—it's a real innovation. It will display to you  
all the best thought of the day in automobile  
designing.

Come see it while it's new.
